

W.P.D.I (DUNETH) SANDARUWAN

Colombo, Sri Lanka | dunethinduvara@gmail.com Portfolio: <https://duneth.me/>

LinkedIn: <https://www.linkedin.com/in/duneth-widanapathirana-634a27299/>

PROFESSIONAL SUMMARY

Highly motivated Computer Networking undergraduate specializing in enterprise routing, network security, and NetDevOps automation. Demonstrated expertise in designing secure, multi-site architectures incorporating IPsec VPNs, Zero-Trust micro-segmentation, and dynamic routing (OSPF/eBGP). Currently pursuing CCNA and CompTIA Security+ certifications. Seeking a Networking or Security Operations internship to leverage hands-on troubleshooting, infrastructure-as-code, and technical analysis skills in a production enterprise environment.

TECHNICAL SKILLS

- **Network Engineering:** Routing & Switching, OSPF, eBGP, VLANs, Inter-VLAN Routing (SVIs), TCP/IP, IPv4/IPv6, DHCP, DNS, NAT/PAT (Overload).
- **Network Security:** IPsec Site-to-Site VPNs, Zero-Trust Architecture, Access Control Lists (ACLs), DMZ Implementation, Device Hardening (SSHv2), Wireshark Packet Analysis.
- **Network Automation (NetDevOps):** Python, Netmiko, Software-Defined Networking (SDN) Controllers, Infrastructure-as-Code (IaC) principles.
- **Systems & Tools:** Cisco IOS, Cisco Packet Tracer, Linux / CLI, Git/GitHub, Bash Scripting.

TECHNICAL PROJECTS

Secure Multi-Site Enterprise Architecture & SDN Deployment

Cisco Packet Tracer, OSPF, eBGP, IPsec, Python

- Architected and deployed a hierarchical enterprise network topology connecting corporate headquarters, a remote branch, and a public DMZ over a simulated ISP WAN.
- Engineered external internet connectivity by peering with an ISP using eBGP and configured NAT (Overload) with strict extended ACL exemptions to prevent VPN traffic drops.
- Secured inter-site communications by establishing a military-grade IPsec Site-to-Site VPN tunnel between edge routers.
- Enforced Zero-Trust internal security by deploying stateless firewalling via Extended Access Control Lists (ACLs) to isolate sensitive Human Resources VLANs from IT and remote branch traffic.
- Integrated Software-Defined Networking (SDN) by provisioning a centralized Network Controller to automate device discovery and configuration management via SSH.

Automated Network Configuration Backup System

Python, Netmiko, Cisco IOS

- Developed a network automation tool using Python to autonomously back up device configurations across multiple nodes without manual CLI intervention.
- Engineered secure SSH connections to simulated network devices to automatically execute, extract, and locally archive timestamped running-config files.
- Demonstrated modern network management practices by scaling device administration through infrastructure-as-code principles.

Global Museum Network Infrastructure

Cisco Packet Tracer, OSPF, VLANs

- Architected a multi-branch enterprise network design to support distributed physical locations with redundant pathways.
- Implemented OSPF routing protocols and scalable VLAN segmentation to ensure secure, efficient, and resilient cross branch communication.

EDUCATION

BSc (Hons) in Computer Networking

Expected Graduation: 2027

University of Bedfordshire (via SLIIT City Uni) | Colombo, Sri Lanka

- Core Coursework: Routing & Switching, Network Security, Data Communication, Network Architecture.

CERTIFICATIONS

- Cisco Certified Network Associate (CCNA) - *In Progress*
- CompTIA Security+ - *In Progress*

LEADERSHIP & EXTRACURRICULARS

Editor, Art Circle

SLIIT City UNI (Spring 2026)

- Directed digital branding and multimedia for major university events, demonstrating strong cross-team collaboration and communication under strict deadlines.
